

IDENTIFICATION

Department	Position Title	
Environment and Climate Change	Superintendent – Land and Water, Beaufort Delta Region	
Position Number	Community	Division/Region
23-14149	Inuvik	Beaufort Delta Region

PURPOSE OF THE POSITION

The Superintendent, Land and Water, Beaufort Delta Region, is accountable to the Assistant Deputy Minister, Regional Operations for developing regional strategies and plans for the delivery of all Department Programs within the functional areas comprised of water resource management, environmental protection, environmental assessment, and management and administration of public lands at the regional and community level in a manner that is consistent with the Department's legislation and vision, and the unique needs of the Beaufort Delta Region.

A key role of this position is providing of leadership, guidance and direction to the Beaufort Delta Regional Land and Water team in the execution of departmental land and water management and administration functions and responsibilities. This position is actively involved in, and part of, the decision-making process.

The position takes a lead role in establishing and maintaining strategic linkages, communication, consultation and information channels within the department as well as with other government agencies, other levels of government, and departmental clients.

The Superintendent, Land and Water, advises the Assistant Deputy Minister, Regional Operations, Deputy Minister, and Minister on a myriad of regional issues. The Superintendent also plays a critical role in supporting and advising the Assistant Deputy Minister, Regional Operations in providing information for presentations, submissions and briefings to the Deputy Minister, Minister, Cabinet, Management Boards and Caucus on regional issues.

The position must provide an equitable distribution of departmental resources across the region while maximizing community and regional participation and control. As a member of the department's senior management team, the Superintendent, Land and Water, is

accountable for collaborating with other regional superintendents, managers and co-management organizations to monitor and evaluate the success with which programs and services contribute to achieving the Department's vision. The position plays a critical role on the Department's Senior Management Team.

SCOPE

The Superintendent, Land and Water, Beaufort Delta Region, is located in Inuvik and reports to the ADM Regional Operations, Department of Environment and Climate Change.

Key to success in this position is providing effective leadership, direction, and oversight to the Beaufort Delta Regional Operations team in the execution of departmental land and water resource administration functions and responsibilities. These functions and responsibilities include the management and administration of leases and other land dispositions, management of the land use permit and quarry permit process, collection and recording of securities associated with land tenure, coordination and provision of regional input in the land withdrawal process concerning land claims and parks establishment, environmental inspections for water licences and spills, enforcement of NWT public lands regulations and environmental regulations, and revenue collection.

The Mandate of the Department of Environment and Climate Change is to manage land, water, air, wildlife, and forests and lead and coordinate the Government of the Northwest Territories in understanding and adapting to a changing climate.

Land Management and Administration is considered core public good and critical infrastructure that needs to be effectively and efficiently managed. The importance of land as a core public good is articulated through the Land Use and Sustainability Framework and Northern Lands - Northern Leadership. Land provides for ecological, spiritual, cultural, recreational and economic goods and services and well as being a predominant and key driver of the NWT GDP. The Superintendent will also lead activities for the strategic implementation of the NWT Water Stewardship Strategy.

The Beaufort Delta Region is comprised of eight communities. A major challenge for the Superintendent is balancing program delivery in a region containing significant natural resource development interests with the interests of smaller communities that are often more traditional economy based. The development of community capacity and responsibility and providing support for community based integrated resource management and resource use decisions will be critical to success in balancing these competing interests.

Superintendents are responsible for developing regional strategies and plans, delivering programs, participating in resource allocation, providing expert advice and support to

communities, participation in monitoring and evaluating program delivery at the community and regional level, and acting as the Department's regional representative at the territorial and national level.

The Superintendent has delivery responsibility under the following Acts and regulations administered by the Department:

- Area Development Act
- Commissioner's Land Act
- Lands Act
- Public Land Act (when brought into force)
- Environmental Protection Act
- Water Resources Agreements Act
- Waters Act

As well as territorial legislation and regulation that the Department administers, the Superintendent is also bound or restricted by a plethora of federal, territorial and municipal legislation and governing instruments that govern the manner in which some Departmental policies and programs are delivered such as the federal Mackenzie Valley Resource Management Act and territorial Evidence Act.

This position also works in a Cabinet approved policy framework by administering the Land Pricing Policy, the Land Lease Only Policy, and the Recreational Leasing Management Framework. It requires knowledge of Lands, Resources, and Self-government Negotiations and Agreements.

The management and administration of land in the NWT occurs in a unique context and is influenced by distinct social, economic and cultural factors and complex regulatory considerations. The NWT land management system features a unique land ownership structure that includes public lands, Indigenous owned settlement lands, federal lands, and private lands; a complex regulatory regime governing the use of land, water, and resources; Lands, Resources, and Self-government Negotiations and Agreements; Aboriginal Rights and Consultation requirements.

The Superintendent, Land and Water, Beaufort Delta must possess an in-depth understanding of this distinctly northern environment within which the GNWT's land management, water resource management, and administration obligations are carried out and possess the ability to provide strategic direction and leadership that is reflective of departmental goals, objectives and priorities.

The position is located in Inuvik and is a member of the Senior Management Team. Directly reporting to the position are Manager Resource Management, Land Use Advisor, Water Resource Officer, Corporate Services Officer and an Administrative Clerk.

The incumbent must promote and advance the strategic direction of the Department within GNWT by ensuring a clear and consistent application of departmental policies, frameworks, and strategies at the regional level.

DIMENSIONS

- Reporting Positions (5 direct, and 4 indirect)
- Compensation & Benefits (\$) 1,500,000
- Operations & Maintenance (\$) 400,000
- Grants & Contributions (\$)
- Capital (\$)

The incumbent works within broad operational and policy guidelines to achieve objectives; work is planned and reviewed with the ADM, Regional Operations. One operational level below the ADM, the incumbent delivers a program which parallels those delivered by large, multi-leveled provincial agencies, and must rely on personal knowledge, experience and judgment in place of larger institutional capacity.

RESPONSIBILITIES

1. Uphold and consistently practicing personal diversity, inclusion, and cultural awareness, as well as safety and sensitivity approaches in the workplace. Practice and ensure that any subordinate management and supervisory roles also prioritize staff mentorship and on-the-job training, including staff development in annual general objectives.
2. Provides leadership, direction, and oversight in the management of land and water services in the Beaufort Delta Region, consistent with relevant land and water acts, agreements, frameworks, strategies and policies including *Commissioner's Land Act and Regulations*, *Territorial Land Act and Regulations*, *Territorial Quarry Regulations*, *Water Resources Agreements Act*, *Waters Act*, *Mackenzie Valley Resource Management Act*, Land Pricing Policy, Land Lease Only Policy, Recreational Leasing Management Framework Policy, Land Use and Sustainability Framework, Lands Resources, and Self- Government Agreements, Devolution Final Agreement.
3. Provides leadership, direction, and management to the Regional Land and Water team in the administration of Commissioner's Land and Territorial Land, including t leases, rights-of-way, licenses, permits and other dispositions.

4. Acts as the final signing authority for lease contracts and contracts for other dispositions.
5. Oversees the management and coordination of the land use permitting process and environmental screenings where the Department is the Responsible Authority under the *Canadian Environmental Assessment Act*.
6. Directs and manages the provision and coordination of regional input in the quarry permit process under the *Commissioner's Land Act and Regulations* and the *Territorial Act and Regulations*.
7. Ensures the establishment and maintenance of strategic linkages, communication, and information channels within the department as well as with other government agencies; other levels of government; and clients with regards to the issuance of land use permits, quarry permits, leases and other dispositions.
8. Represents the Department and Beaufort Delta Regional Operations as a member of various screening and management committees and with Indigenous governments, community representatives, other levels of government, industry, and Institutions of Public Government established pursuant to settled Lands, Resources and Self-government Agreements.
9. Directs and manages the implementation of regional operational obligations under land claim agreements and provides an operational perspective on the Department's overall implementation process.
10. Directs and manages the provision and coordination of regional input in land withdrawal processes related to land claims and establishment of conservation areas.
11. Oversees the identification, inventory and assessment of wastes sites on NWT public lands as well as the development of clean-up plans and related projects.
12. Oversees and in complex cases participates in site inspections to investigate potential hazardous materials spills and development projects.
13. Oversees the enforcement of legislation with respect to the use and management of land and water resources, and provides guidance to regional staff, departmental management, and the private sector on methods of conducting field inspections to ensure compliance.
14. Directs and manages the review of regional standards and procedures to ensure they meet accepted standards or legislated requirements.

15. Provides review and analysis of departmental policies, as well as policies of other departments and organizations to determine their adequacy or applicability to regional operations.
16. Provides advice and recommendations on the development and implementation of departmental legislation, regulations, strategies, policies, guidelines, and procedures.
17. Oversees the development and implementation of various regional security, occupational health and safety, and fire/emergency plans to provide for the safety and security of regional lands and water staff working in an office and field environment.
18. Directs and manages the allocation of human, physical and financial resources in accordance with approved strategic and business plans and in the most cost-effective and efficient manner.
19. Advances the GNWT's decentralization objectives by ensuring that human resource management strategies and approaches promote regional capacity development and the provision of appropriate standards and levels of service.
