

IDENTIFICATION

Department	Position Title	
Northwest Territories Health and Social Services Authority	Distribution Officer	
Position Number	Community	Division/Region
48-8100	Yellowknife	Materials Management and Contracting

PURPOSE OF THE POSITION

The Distribution Officer is responsible for maintaining adequate inventory levels and delivering stocked supplies to all medical wards and other locations throughout Stanton.

This position is responsible for issuing, picking and delivery of stocked orders and picking up contaminated instruments from various medical areas within the Hospital. This position is also responsible for issuing, picking and preparing bulk shipments of stocked supplies for clinics in Yellowknife and other regional facilities when requested. These duties are performed on an-as-and when and scheduled basis to ensure that all areas within the hospital, Medical Clinics and some regional facilities have the required supplies in stock to provide professional health care.

SCOPE

Located in Yellowknife, the Distribution Officer reports to the Supervisor, Materials Management.

The Northwest Territories Health and Social Services Authority (NTHSSA) is headquartered in Yellowknife and is responsible for delivering health and social services in most communities across the NWT. The NTHSSA covers 1.2 million square kilometers and services approximately 43,000 people, including First Nations, Inuit, Metis, and non-aboriginal peoples. The NTHSSA delivers a full-range of primary, secondary and tertiary health and social services including family services, protection services, continuing care services, diagnostic and curative services, care placements, mental health, addictions, rehabilitation, and developmental activities. These services are delivered by more than 1,400 health and social services staff.

Stanton Territorial Hospital (Stanton) is an accredited facility in Yellowknife, and is the referral center for approximately 40,000 regional residents of the Western Arctic and Nunavut (Kitikmeot Region). Stanton provides health care services to adults and children on an inpatient/outpatient and outreach basis in order to restore health with dignity.

Located at Stanton the Distribution Officer is part of a three-member team that is responsible for maintaining the appropriate inventory levels of stocked supplies in each of the wards/clinics in the Hospital to provide the safe, efficient and effective delivery of stocked supplies to end users. These supplies are required by the end users in order for them to provide professional health care services to residents of the NWT and Nunavut. The three Distribution Officers work a rotating schedule with two Distribution Officers on duty every day. The early shift is from 7:30 to 15:30 and the late shift is from 9:30 to 18:00.

Properly maintained inventory levels and supplies issued/delivered in an effective and efficient manner ensures; that health professional have the supplies to provide safe, timely and professional health care services to the general public; reduces inventory stock outs that could negatively impact the level of care provided to the general public, and ensures that costs of supplies are allocated to the proper health authority and/or department.

RESPONSIBILITIES

1.  - Check MSDS sheets and update in system if requested; and
 - Assists in other areas of Materials Management when requested by the Supervisor.

WORKING CONDITIONS

Physical Demands

The incumbent is required to distribute large heavy carts (IV & Medical exchange carts) of supplies, and to lift/move/delivery heavy boxes of supplies and copy paper to various locates throughout the hospital on a daily basis. Other daily physical demands include lifting, bending, walking and reaching.

Environmental Conditions

The incumbent is required to deliver medical and non-medical supplies to all areas throughout the hospital and could have exposure to potentially infectious diseases.

The incumbent also works in the Stores area and is subject to dust and other elements found in a typical warehouse environment.

Sensory Demands

The incumbent must visually inspect medical supplies to constantly ensure they have not expired and/or are not damaged in any way before they are delivered to the end user. Damaged packing could impact the sterility of the supplies and could result in the spread of infections and expired supplies could negatively impact the care of patients.

Mental Demands

Maintaining the appropriate and adequate levels of inventory on IV & medical exchange carts and in wards throughout the hospital is critical. However, due to changes in requirements, emergencies, back orders or increased usage of specific medical supplies, it is imperative that communications between all areas is maintained. In these situations immediate changes to delivery schedules, or finding supplies in other wards or temporary changes in quotas and proper communications to Purchasing is imperative to ensure that store stock is maintained and delivered in a timely and professional manner. Not having the appropriate supplies readily available could impact if the level of patient care provided to patients.

KNOWLEDGE, SKILLS AND ABILITIES

- Knowledge of distribution and inventory management functions to effectively maintain the IV and the Medical Exchange carts and Ward inventories to ensure that each area has the appropriate and adequate levels of supplies on hand to provide safe and timely professional health care to patients. This knowledge is also required to have a good understanding of basics inventory controls activities such as lead times, re-order points, quotas, turnover, back orders, stock outs, delivery schedule, inventory counts and issues, which all impact on the level of service provided.
- Knowledge of warehouse/logistics functions and principles in order to assist in maintaining stores and distribution areas in a safe, effective and efficient manner.
- Good communication skills in both written and oral to effectively communicate with a wide variety of end users, purchasing and inventory control staff and to the ability to comprehend and follow both written and verbal instructions.

- Familiar with medical terminology in regards to supplies in order to understand and communicate effectively with health care professional looking for supplies.
- Ability to read and understand material safety data sheets and knowledge of the Workplace Hazard Material Information System.
- Excellent time management and organizational skills and ability.

Typically, the above qualifications would be attained by:

Completion of a High School Diploma combined with one year of directly related experience working in a warehouse/logistics/distribution environment dealing with inventories or in a hospital setting with experience handling/distribution of medical supplies. Equivalent combinations of educational qualifications and experience will be considered on individual basis.
