

# Government of Northwest Territories

#### **IDENTIFICATION**

Department	Position Title	
Health and Social Services	Mental Health Specialist, Addictions	
Position Number	Community	Division/Region
49-00585	Yellowknife	Mental Wellness and Addiction Recovery/HQ

## **PURPOSE OF THE POSITION**

The Mental Health Specialist, Addictions, is responsible for providing consultation, monitoring and evaluation services to the GNWT, Health and Social Services Authorities, agencies and other stakeholders regarding mental wellness and addictions recovery services. This is to ensure that effective mental health/addictions programs and services are available, in accordance with GNWT policies, legislation and standards as well with the established best practices for mental health/addictions.

#### **SCOPE**

Since 2013, the NWT health and social services system has been engaged in a strategic renewal process. This began with System Transformation, a multi-year, community engagement-driven process to develop a model for an integrated health and social services system. The resulting changes to the system's governance structure have enabled a one-system approach, allowing for greater efficiency and integration while better respecting the unique contexts and strengths of the NWT's distinct regions and cultures.

Building off the results and momentum of System Transformation, the strategic renewal effort has now begun a process of Primary Health Care Reform to shift the system and its care models towards a team and relationship based approach that is driven through public participation, community feedback and data, and built upon a foundation of trust and cultural safety. Using a community development approach, we are changing the way we work with people and communities, at every level of the health and social services system, to enable public participation in priority setting, planning, and design that integrates the social determinants of health.

The integration of mental wellness and addiction recovery is an important component of ongoing system transformation and reform.

The legacies of colonization and residential schools have impacted Indigenous health outcomes and the way health and social services are delivered and accessed.

MWAR divisional staff are expected to honor and promote a culturally safe environment at all times and to interact with clients and families, community members, partners and colleagues in a tactful, respectful and humble manor that is free of racism and discrimination.

Located in Yellowknife and reporting directly to the Manager, MHA System Quality and Integration, the position is involved in extensive consultation, collaboration and partnering with the Department, Primary Health Care Reform, the Social Envelope Departments, all NWT Health and Social Services Authorities, and territorial, regional and community organizations.

The Mental Health Specialist, Addictions, is responsible for providing consultation, monitoring and evaluation services to all of the above, in order to ensure that effective mental health/addictions and addictions programs and services are available to the population of the NWT.

This position impacts directly on the extensive mental health/addictions and addictions problem in the NWT, which include trauma from family and institutional violence, mental illness, and emotional and behavior problems among children and youth.

The Mental Health Specialist, Addictions is responsible to manage contracts and contribution agreements (\$500,000) for territorial core mental health/addictions services as well as additional special projects.

The Mental Health Specialist, Addictions is responsible for developing and fostering a positive working relationship with the Health and Social Services Authorities, the Department, NGOs, and other stakeholders in order to assess and deliver the type and level of support required to ensure the delivery of effective mental wellness and addictions recovery programs and services.

#### RESPONSIBILITIES

- 1. The Mental Health Specialist, Addictions is responsible for developing and fostering a positive working relationship with the Health and Social Services Authorities, the Department, Primary Health Care Reform, NGOs, and other stakeholders in order to assess and deliver the type and level of support required to ensure the delivery of effective mental wellness and addictions recovery programs and services.
