

Download and install VPN on your personal home computer (Windows)

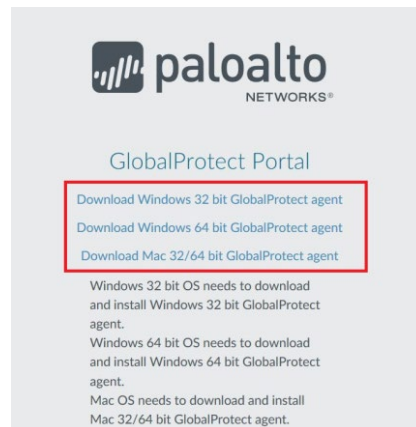

1. Open a web browser and go to gnwt-vpn.gov.nt.ca.

2. **Log in** using your GNWT account username and password.

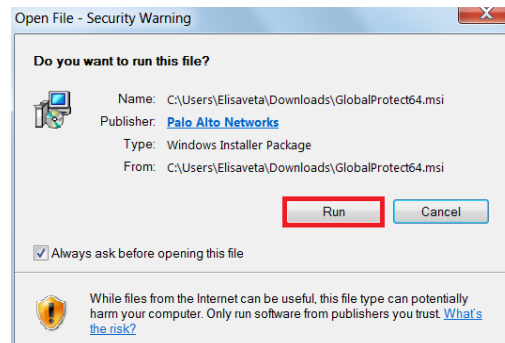

3. Start the **download** by clicking the software link that corresponds to the operating system running on your computer.

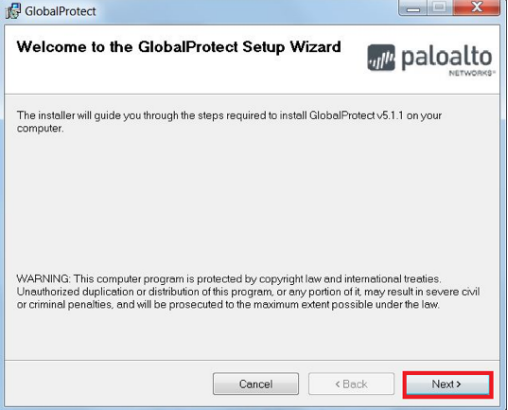

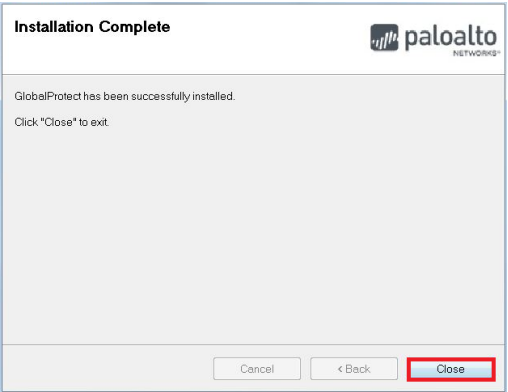

If you are not sure if you have 32- or 64-bit Windows, you can check by opening going to **Settings**, then **System/About**.

4. Locate and open the downloaded file.

5. Click **Run** to start the install.

<p>6. Follow the prompts to complete the install.</p>	
<p>7. Click Close to complete the installation.</p>	

If using a personal computer make sure it's up-to-date and secure:

- Use Windows 8 or higher
- Set up automatic Windows security updates
- Have an up-to-date and antivirus installed and running

If you experience any issues logging into VPN, please contact the TSC Service Desk at Phone (867) 920-4408 or 1 (866) 380-6777 toll-free.
